DigiPrima differentiates itself from others:

- Providing **senior-level business and client-facing resources** such as business analysts, project managers, and architects, available during US timeframes at competitive prices.

- Offering **technology specialists for ERP support** (SAP, Oracle, etc.), application development, QA testing, web design, and application management services, with **24X7 global delivery** at even more attractive price points.

- Investing in software development **methodologies, proprietary tools, accelerators**, and delivery frameworks, with trained consultants ready to start quickly at any client.

- Ensuring **flexible staffing with quick ramp-up/ramp-down** capabilities, available during US and offshore timeframes, at extremely attractive rates.

- Collaborating with customers on **AI, Analytics,** Mobile, and web application **proof-of-concepts** for co-development.

- Developing and launch **cutting-edge AI/ML and BI software** products customized to meet customer needs.

- Maintaining a customer-focused, responsive, and **reliable management team** to ensure client satisfaction and success.

- Delivering **end-to-end project management** and consulting services for seamless implementation and support.
